**Household:** A household includes all the people who occupy a housing unit as their usual place of residence.

**Family:** A group of two or more people who reside together and who are related by birth, marriage, or adoption.

**Per capita income:** Average obtained by dividing aggregate income by total population of an area.

**Aggregate:** The sum of the values for each of the elements in the universe. For example, aggregate household income is the sum of the income of all households in a given geographic area. Aggregates are frequently used in computing mean values (mean equals aggregate divided by universe count).
